

A black BXB FUN conference microphone is positioned on a long wooden conference table. The microphone has a flexible gooseneck and a control panel with a red LED indicator and a speaker grille. The background shows a well-lit meeting room with other microphones and chairs around the table.

Taiwan Fire & Marine Insurance Selected BXB's FUN Conference Microphones

Writer/ Dept. of Sales1

Taiwan Fire & Marine Insurance Co., Ltd. is the enterprise previously owned by the Japanese during the Japanese colonial period. In June 1946, it was named "Taiwan Fire & Marine Insurance Preparation Office", which took over insurance properties and underwrote new insurance businesses. Then on March 12, 1948, it was officially established, making it the oldest non-life insurance company in Taiwan.

It's the honor that BXB's FUN conference microphones are installed in this company. The installed equipment includes FCS-6350 Conference MCU x 1, FUN-6313 Table-top Conference Microphone x 1, and FUN-6314 Table-top Conference Microphone x 24. FUN Conference Microphone was not only awarded Taiwan Excellence Award and iF Design Award in 2015, but got G-mark Design Award in 2016.

The color of FUN microphone can be varied, which is able to fit with different decorations and styles of meeting rooms. Besides black, there're white and champagne gold for you to choose. Therefore, meeting is no more a boring and stressful occasion, but the activity that is able to make you enjoy thinking and talking as well as to urge all attendees on achieving a win-win outcome. The 45-degree angle design of FUN offers users' intuitive operation and the maximum available space of table-using. Moreover, the LED ring is concealed inside of the microphone capsule so that the in-use speaker wouldn't be influenced by the harsh light of LED. These are the special designs that BXB offers to all users.

Each FUN unit is equipped with OLED display that shows four operation modes (Normal/FIFO/Override/Chairman) and unit's ID numbers. The chairman/delegate identity of each unit can be also freely set based on the meeting requirements, which enhances the meeting's flexibility.

Furthermore, each unit is equipped with DSP chip that is able to detect the speaker's volume and then auto-adjust the sensitivity of sound receiving, making the sound keep with the most ideal volume. Therefore, you don't need to worry about the sudden sound explosion caused by the close distance between you and your microphone. The voice-activation function (VOX) is able to recognize the speaker's voice accurately and then auto-activate the microphone. Other surrounded noises such as loudspeakers and applause would not be wrongly received. After the speaking is finished, the microphone would be auto-deactivated.

Regarding the cabling, FUN's system can be constructed with ring-connection, which offers a backup mechanism with safety. Even though one of the loops is broken or disconnected, you can easily connect microphones to the other loops without affecting the system operation! BXB's conference system possesses user-friendly interface met with users' needs on meeting management, making a meeting go smoother. We have professional techniques and sound customer services. Please support us more since your encouragement is the greatest power to us for product/service developments!
