TAIWAN
EXCELLENCE 2016

The 24th Taiwan Excellence Award winners has been announced, BXB Electronics (stock number 7497) nominated three products EDC Table-top conference microphone, Digital IP-based Campus PA & Command System along with Software, all got the award!

Total 1,180 products joined the competition in this year. Under the rigorous examination of 88 judges, BXB products were selected as the representative ones of owing excellent image and innovative value due to the great performance of novel and continuous innovation, design, quality and marketing.

The design concept of the awarded products EDC Table-top Conference Microphone came from the stabilization and warmness of “Home”, which appearance adopted the inclined roof generally seen in Chinese traditional residences. The countersink on each unit follows the shape of butterfly. Butterfly is not only the original concept of BXB’s logo, but can be the assonance of double-fortune signal. We wish to inspire the atmosphere of steady and harmonious to conference events.

In addition, BXB puts great emphasis on the development of campus technology, and regards “Learning, Safety and Energy” as our goal to progress. Digital IP-based Campus PA & Command System and Digital IP-based Campus PA & Command System Management Software are invented on the basis of the principle to endow traditional PA system a novel concept. This system is characterized digital, video, multi-communication and mobility, and effectively provides complete solution for intelligent teaching, management and security. Following are the features:

- Intelligent teaching : IP network technology enables 8 channels Full-HD videos transmit simultaneously to more than 250 receiving ends to achieve intelligent teaching.

**TAIWAN
EXCELLENCE 2016**

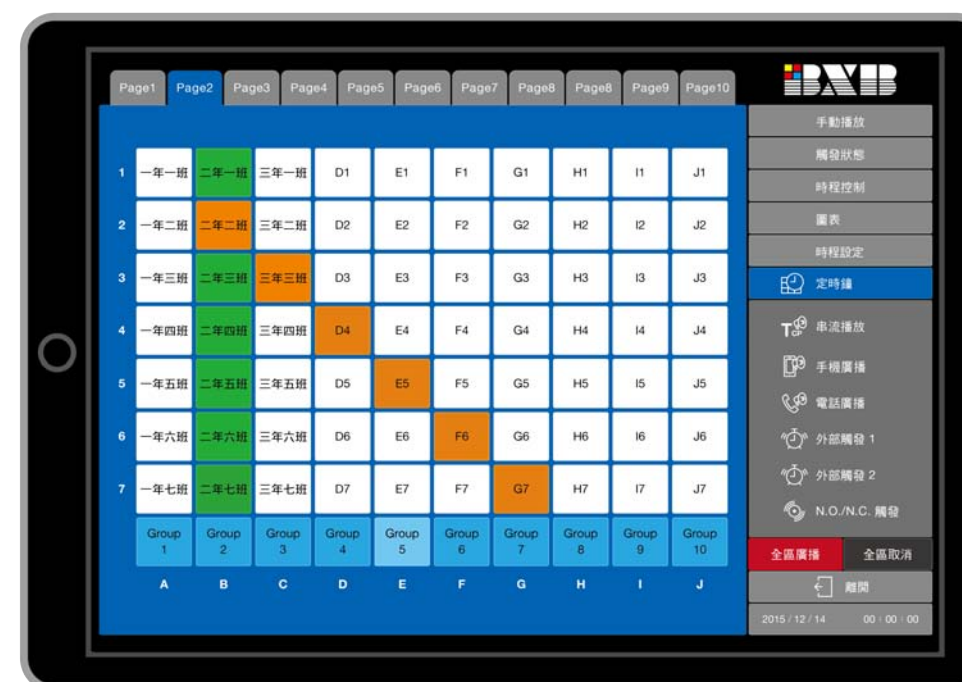

· **Intelligent management:** Classrooms are equipped with intelligent management function to control TVs, projectors, air conditioners, lighting, fans and power switches. Furthermore, send back situations and analyze the information to avoid fire caused by electric wire or unnecessary energy loss.

· **Intelligent security:** Door access, security alarm, emergency call and video intercom are equipped. Security system can integrate with campus billboard, making use of intelligent analysis to build a safe and comfortable campus.

BXB (stock number 7497) won Taiwan Excellence four years in a row. All our most demanded products are awarded, which means BXB always stand on the side of customers to launch products meeting their needs. We will do our best to put more resources in R&D and design of promising products!
